

IN THE CLAIMS:

1. - 13. (Cancelled)

14. (Currently Amended) An antenna duplexer, comprising a filter including a plurality of resonators, the resonators being coupled to one another by electromagnetic-field coupling,
wherein non-adjacent resonators of said plurality of resonators are electrically coupled to each other with a [series] bypass circuit formed of a bypass capacitor and a non-grounded transmission line, and
the filter is used as one of or both of filters on transmission and reception sides.

15. - 16. (Cancelled)

17. (Currently Amended) Communication equipment, comprising a filter including a plurality of resonators, the resonators being coupled to one another by electromagnetic-field coupling,
wherein non-adjacent resonators of said plurality of resonators are electrically coupled to each other with a [series] bypass circuit formed of a bypass capacitor and a non-grounded transmission line.

18. - 19. (Cancelled)
